A Message from CEO

Rishi Jawaheer

"Care Vision AI was built around real-life routines and challenges, to allow **carers to focus on what truly matters**: spending valuable time with those we care for."

"Having grown up in my Parents Care Home, all the way to now leading a group of Care Homes, I've experienced and heard the struggles of Carers. When we were looking at digital transformation in my Care Group, we tried multiple Care Management Systems, but we realised to achieve real transformation we needed integration across platforms and departments.

That's why I built Care Vision AI: to put Care Providers and Carers at the centre of development."

Why **CareVision AI**?

We are an all-in-one cloud-based Care Management solution, designed by those with firsthand experience in Care Homes. Offering seamlessly integrated modules for everything: from Resident Care to Housekeeping.

At Care Vision, **we are a family**, not just a Digital Care Management System.

Our experience-driven platform brings efficiency to your operations daily, while paving the way for the future of Care. We embrace AI and predictive analytics, aiming to harness your rich data into proactive insights.

Our Clients are our best developers, we actively welcome feedback, and use this to improve our system for everyone.

Care Vision Features

Build a personalised system by selecting the modules you need and manage everything all in One Platform

Care Planning

Build Care Plans easily, have them written in no time.

- Easy, Comprehensive and Advanced.
- AI can build tailor made Care Plans.
- Saves time.

ROTA

Accurately record attendance with our Clocking-In Machine.

- Staff scheduling made simple.
- Reduces scheduling errors.
- Tracks shift changes.

eMAR

Simple and easy to use E-Mar interface. Real-time audits.

- Digital medication records.
- Easy dose tracking.
- Reduce admin errors.

HR

Minimises the time required for new Staff to gain knowledge of individual needs.

- Manages Staff records.
- Handles recruitment tasks.
- Handles payroll tasks.

Billing

Gain real-time access to accounts and financial information.

- Automated billing processes.
- Tracks payments efficiently.
- Reduces billing errors.

Visitor Book

Fully paperless, GDPR compliant, and includes visitor surveys.

- Digital visitor log.
- Improve security.
- Tracks visitor history.

Care Vision Features

Build a personalised system by selecting the modules you need and manage everything all in One Platform

Housekeeping

Housekeepers, Maintenance and Laundry staff hold.

- Tracks cleaning status.
- Ensures hygiene standards.
- Quick issue resolution.

Nurse Call Integration

Aids Care Home Residents in promptly reaching a Nurse when necessary.

- Quick emergency response.
- Track Nurse alerts.
- Improves Resident safety.

Nutrition

Food and Nutrition Care: quality foods for a healthy diet.

- Custom Meal Planning.
- Track Dietary needs.
- Ensures balanced nutrition.

Inspection IQ

Inspectors can quickly access information, without you having to lift a finger.

- Policies have read receipts.
- Record feedback of Service Users and Staff.

Family App

Families and Inspectors crave transparency and an open culture of communication.

- Share media both ways.
- Sign electronic care plans and E-Consent.

Service User Funds

Allows Families to manage funds for Care Home expenses and hobbies.

- Monitors fund usage.
- Track all expenses.
- Ensures clear records.

Next-Level Care with Artificial Intelligence

Smarter Tools, Happier Teams, Healthier Residents

Our AI is not and will never be used to replace Carers. The goal has always been clear, to give time back to Carers, so that they can dedicate time to those they support.

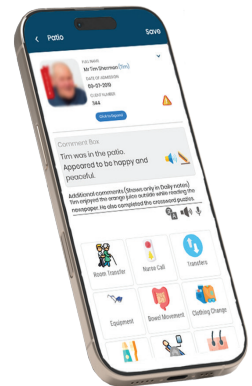

This isn't just about technology, it's about building solutions which support those delivering care every day.

AI Interactions and Care Plans

Care Vision AI allows Carers to use our AI tool to build and write personalised Care Plans for those they care for. Utilising its own intuition, alongside your rich data, Care Vision AI will create personalised and tailored Care Plans that meet your needs.

AI Interactions allow for Daily Notes to be written faster, so Carers can focus on providing Care for those they support. Whilst also ensuring that everything meets CQC standards. Daily Notes need detail, and often Carers do not have the time, and that is why we designed our AI solution.

Our in-house AI development Team, work closely with AI data experts – Impact Privacy – to ensure that our AI solution is in line with GDPR, remains ethically correct and focuses on information security.

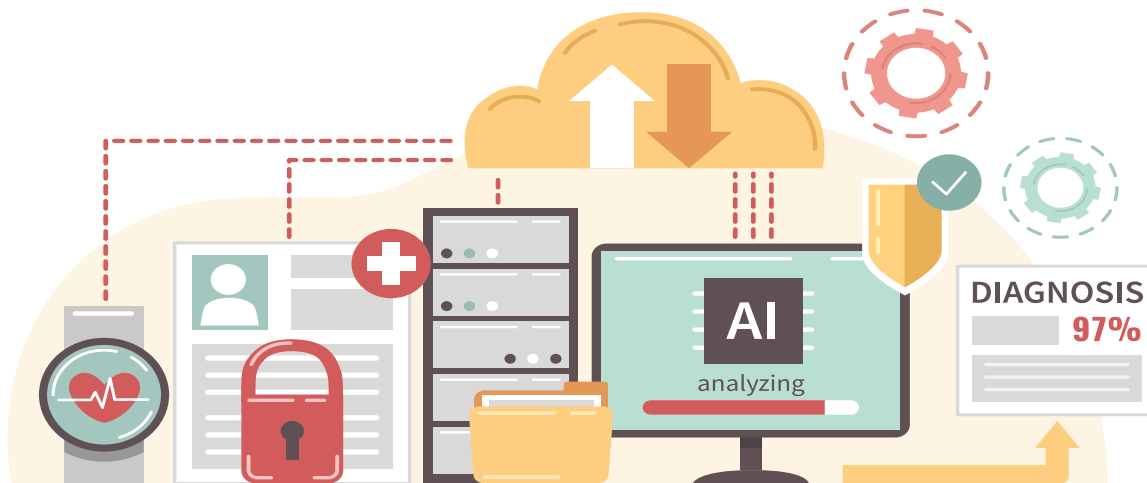

Next-Level Care with Artificial Intelligence

Care Vision AI

By reducing manual workload, Care Vision AI enables carers to focus on meaningful human interactions while ensuring care documentation is accurate, consistent, and instantly available.

Our AI tool was developed from the feedback of Care Teams, who felt that admin work took valuable time away from Residents. We are using cutting-edge AI to remove those barriers, ensuring Carers can focus on those they care for, not paperwork.

Care Vision AI analyses real-time and historical data from daily notes, assessments, risk scores and alerts. It generates accurate, personalised care plans, provides AI-driven prompts to support daily documentation, and identifies potential risks or changes in a resident's condition, enabling timely and informed intervention.

eMAR – Medication Made Simple

Created by people who understand care.

Stay one Step Ahead

Give your team up-to-date info, reminders, and alerts to help keep medication management smooth and safe.

Built for Real-world Care

Whether you're following NHS, CQC, or local regulations, we help your team stay compliant.

Medication Done Right

Medication that is simple and clear: the right resident, medicine, route, dose and time, all at your fingertips.

Connected for better Care

Connects GP and Pharmacy systems, making it easier to share prescriptions and medication details securely. Saving time and reducing errors.

Simplified Management

Integrates easily with various administrative & medical processes, optimising the team's time & ensuring excellent service.

Security & Protection

Runs securely in the cloud, with trusted security protocols. We're fully GDPR compliant, and meet the standards of the NHS (DSPT).

CareVision Integrations

GP Connect

For GP Connect it's as simple as selecting 'CareVision' as your software supplier on the NHS Portal, and sharing your ODS code. GP Connect allows you to not only view a Resident's care record, but you can also manage their appointments for them.

- Reduce Admin time with automated data handling.
- Faster availability of information.

Data Compliance

Data Security and Compliance you can trust

Safeguarding sensitive information is at the heart of our system. We partner with Impact Privacy to make sure every part of Care Vision is secure and compliant. Your information is handled with the highest standards of data protection, from residents' records to staff details.

- Fully GDPR Compliant
- Regular checks and audits
- Secure storage of sensitive data

London Care Record

Our partnership with the London Care Record, allows you to access it entirely from within Care Vision. The LCR provides care providers read-only access to patient information from health and care organisations across London. This single and secure view of patient information can help speed up communication between care professionals across London.

- Easily view Resident's test results, medicines, and allergies.
- Saves frontline staff crucial time.

Testimonials

“Our Staff have been amazed by Care Vision, it's so easy to use and has given our Team, time back to dedicate to our Residents. The Staff told us they prefer Care Vision to alternative care planning platforms. We have felt valued, with our views and ideas listened to at every opportunity. The recording of care is so efficient, staff and residents are happier as they have more time for meaningful engagement and improving the quality of care provided.”

Charlotte Cole
Care Quality Manager at
WeCareGroup

“Care Vision has been invaluable in helping us deliver safe, person-centred care daily. Unlike other providers where queries are handled through automated systems or long waits, Care Vision gives us direct, human access to knowledgeable professionals. Care Vision is more than a system; it's a vital part of our team: always giving time back to our Carers.”

David Duggan
Director of Ryan QC Homes

Testimonials

“Care Vision care first and foremost, coming from a background in care, they understand us. Our Staff have found it to be very easy to use – it’s totally intuitive and can be used by speaking or using icons. The ability to record in different languages, supports our diverse workforce and makes everyone feel included. With Care Vision, we don’t feel like a number as we have with other systems, our needs are always listened to and we are treated with kindness.”

Sarah Willitts

Associate Operations Director
at Abbey Healthcare

“Compared to other systems, Care Vision is extremely accessible: the speech to text and icons, help team members who have learning needs or English as a second language to record care to an excellent standard. For many systems you are just a number, but the team at Care Vision, recognise us as individuals and as an organisation. Inspectors have been very impressed with the system, and we feel Care Vision helped us to evidence our quality of work in all areas.”

Cheryll Champion

Head of Innovation, Quality and
Compliance at LDC Care, Former CQC
Inspector

Created by Care Providers, for Care Providers.

Care Vision AI is an all-in-one cloud-based Care Management solution, designed by those with firsthand experience in Care Homes. We offer seamlessly integrated modules for everything: from Resident Care, all the way to Housekeeping. Our experience-driven platform brings efficiency to your operations daily, while paving the way for the future of Care.

Our new AI tool allows for the creation of predictive analytics, aiming to harness your rich data into proactive insights. Care Vision AI, can now build your Care Plans and provide enhanced levels of detail to your Carer's Daily Notes: so that you can present more information regarding your Residents to CQC, and your Staff can dedicate more time to your Resident – which is what matters most!
